

## Village of Glendale Heights North Avenue Inflow and Infiltration (I&I) Repairs – Phase 2 Project CONSTRUCTION NOTICE

The Village of Glendale Heights will be performing a sanitary sewer manhole rehabilitation project located generally in the North Avenue Catchment area. Approximately 100 sanitary sewer manholes will be epoxy lined to reduce the amount of clean water (inflow and infiltration) that enters the sanitary sewer system. Additional manhole maintenance will be performed, as needed, which may include adjusting/replacing the sanitary sewer frame, reconstructing the bottom of the manhole, and site restoration adjacent to the structures.

The Village awarded a contract to Hoerr Construction, Inc. to perform this work. Construction is generally anticipated to start in late May and be completed by late August 2023. The typical work hours of construction will be between 7:00 a.m. and 5:00 p.m. Monday through Friday.

Residents or property owners with special needs or general questions are encouraged to contact the Project Resident Engineer, Andrew Bourke, at (224) 500-0019.

The Village of Glendale Heights is committed to minimizing any inconveniences that arise and looks forward to the successful completion of this project.
