Re: **Glendale Heights – IL0430400**
2019 Public Water Supply Inspection Report

Dear Mr. McCumber:

An engineering evaluation of the Glendale Heights community water supply has been completed. A field inspection was made on May 28, 2019 by Grover Hopkins of this office. Jeff McCumber was present during this inspection.

The Illinois Environmental Protection Agency conducts periodic inspections of all community water supplies to determine if their ongoing programs for monitoring, maintaining the water supply, and providing appropriate information to the water users meet the requirements of the Illinois Pollution Control Board's public water supply regulations and related standards. The reason for this work is that if the people in a community are to cooperate and use a common water supply, they must feel that their system is properly constructed, operated and maintained.

Based on this evaluation, we have concluded that the water supply is being properly operated and maintained; and is satisfactorily protected against the entrance of contamination.

The Illinois Pollution Control Board Regulations can be downloaded from the internet at www.ipcb.state.il.us. The *Recommended Standards for Water Works* is available from Health Education Services, P.O. Box 7126, Albany, New York, 12224. (Phone: 518-439-7286 / FAX: 518 - 439-7022). This document may also be purchased through the internet at www.hes.org

We also request that you review the enclosed "Public Water Supply Data Sheets". Monitoring requirements are determined by the information included on these data sheets, making it vital that you inform us of any errors or other inaccuracies.

Glendale Heights – IL0430400
